

Bollard Chain Mounting Bracket 114mm – Galvanised

B114-CMB-G

Description

Enforcer Bollard Chain Mounting Bracket 114mm – Galvanised is a durable Y-style bracket designed to securely attach safety or barrier chains to 114mm bollards. Manufactured from galvanised steel, it provides enhanced corrosion resistance and long-term outdoor performance.

Engineered for strength and simple installation, the bracket features four pre-drilled fixing holes for rivet attachment, making it suitable for car parks, warehouses, pedestrian control zones, and industrial sites. It offers a practical solution for creating flexible barrier systems between bollards.

Features

- Designed specifically for 114mm bollards.
- Made of galvanised steel for corrosion resistance.
- Ideal for attaching plastic or metal barrier chains.
- Suitable for indoor and outdoor applications.

Specifications

SKU	B114-CMB-G
Size	60x55x50 mm
Thickness	2.75 mm
Bracket Curvature	R57 (to suit Ø114mm bollard)
Weight	0.11 kg
Material	Galvanised steel
Colour	Galvanised
