

Heavy Duty Breakaway Bollard - 165mm 2-Part Hot Dipped Galvanised

BB165-IG-G

Description

Designed to minimise damage, Enforcers Breakaway Bollard 165mm 2 Part Hot Dipped Galvanised breaks away during impact and protects your concrete and assets by breaking only the attachment screws and not the concrete surface.

Constructed from hot dipped galvanised steel pipe, this bollard is designed to resist rusting and corrosion. The 2 part design provides impact absorption and minimises damage to the environment. It suits high traffic areas that are more likely to experience accidental knocks, such as busy loading zones.

Features

- Manufactured from hot-dipped galvanised steel pipe.
- 2 part design to impact absorption and minimises damage to the environment.
