

Heavy Duty Breakaway Bollard - 220mm 2 Part Hot Dipped Galvanised

BB220-IG-G

Description

The Enforcer Breakaway Bollard 220mm 2 Part Hot Dipped Galvanised is heavy-duty meets smart design. During impact, this 2 part bollard is designed to breakaway, absorbing the impact instead of ripping out of the concrete and causing more damage and need for repairs.

Constructed from hot dipped galvanised steel pipe, this bollard is designed to resist rusting and corrosion. The 2 part absorbs impact by breaking the screws during knocks instead of the concrete surface. It suits high traffic areas that are more likely to experience accidental knocks, such as busy loading zones or factory floors.

Features

- Withstands from heavy cars, trucks, and forklifts.
- Manufactured from heavy duty steel pipe.
- Removable strong metal bollard dome cap.

Specifications

SKU	BB220-IG-G
Diameter	220 mm
