

Bollard Flexible Delineator - Two Piece

BFlexi-D-2PC

Description

Enforcers Bollard Flexible Delineator - Two Piece is perfect for temporary delineator projects where boundaries need to be set without the risk of costly damage to vehicles. The innovative design features a rubber joint that allows the bollard to flex and bounce back after impact occurs, providing a warning to drivers without causing damage.

Perfect for managing traffic flow and safeguarding assets in warehouses, loading docks and other facilities or for construction sites and roadworks.

Features

- Flexible rubber joint allows the bollard to flex and return upright after impact.
- Durable, lightweight polyethylene construction.
- High-visibility orange finish with three reflective white bands.
- Suitable for warehouses, loading docks, construction sites and roadworks.
