

Kerb Ramp Rubber Black - 150mm High

BKR-150

Description

Enforcer Kerb Ramp Rubber Black 150mm is built from super durable 100% recycled rubber. It can be used to create a smooth transition, preventing wheel damage and accidents. The suitable strong design can withstand vehicle traffic and the tread makes it perfect for pedestrian access. It can be used in parking lots, warehouses and anywhere where improved accessibility is needed. It can even be used in residential settings to create access for low profile cars.

The 150mm high ramp reduces the risk of accidents and can be used to provide accessibility for wheelchairs, lawn equipment and bicycles. The highly durable rubber construction can perform in high traffic areas, can withstand vehicle traffic, and harsh weather. The rubber tread increases traction and safety.

Features

- Made of recycled rubber.
- Anti-slip design that absorb shock.
- Easy to maintain and is portable.
- Can be used in both commercial and domestic settings.
