

Bike Rack Double Tier Height with Ramp for Bikes

BR-DH

Description

Enforcers Bike Rack Double Height with Ramp for 2 Bikes allows you to safely store twice as many bikes by maximising the use of horizontal space. The lower tier is fixed to the ground pivot and the bike simply glides on to the tracks. The upper tier has a gas-assisted strut for easy use. Available in two heights, 1330mm and 1530mm high. Our bike rack meets Australian safety standards and is AS2890.3 compliant. It has been designed from strong and durable hot dipped galvanised steel to ensure longevity and performance.

Features

- Available in two alternating high and low heights, for easily staggering the bikes.
- Each racks holds 2 bikes.
- Fast and easy assembly on site.
- Maximum storage in small space.
