

# Bike Rack City of Melbourne Design In-Ground Galvanised BR-IG-GAL-MC

## Description

The Enforcer City of Melbourne Design In-Ground Bike Rack (Galvanised Steel) provides secure, robust, and compliant bicycle parking specifically designed for permanent installation in urban, commercial, and public spaces. Constructed from structural-grade steel tubing and fully hot-dip galvanised for superior corrosion resistance, this bike rack ensures reliable performance and exceptional longevity, even in harsh coastal or outdoor environments. Featuring welded 100mm x 100mm x 5mm base plates for secure concrete embedment, it offers stable, durable installation compliant with City of Melbourne specifications. Delivered professionally wrapped for safe transport and handling, this rack is ideal for councils, transport hubs, shopping centres, and large-scale infrastructure projects requiring durable and compliant bicycle storage solutions.

## Features

- Designed with welded base plates, allowing secure, permanent embedment in concrete footings.
- Made from structural-grade steel tubing for superior strength and resilience.
- Hot-dip galvanised (HDG) coating ensures maximum protection against rust and corrosion.

## Specifications

SKU	BR-IG-GAL-MC
Diameter	48 mm
Wall Thickness	2.75 mm
Width	850 mm
Height	1050 mm
Curved Pipe	ø25 x T2 mm
Base	100 x 100 x T5 mm
Colour	Galvanised
Material	Hot dipped galvanised steel
Warranty	12 months
