

Bollard Square Surface Mounted 120mm Galvanised

BS120-SM-G

Description

The Enforcer Square Surface Mounted Bollard (120mm Galvanised) is a robust and permanently fixed security solution, designed to protect assets, infrastructure, and high-traffic zones from vehicle impact and unauthorised access. Engineered with a reinforced 120mm x 120mm steel profile and 5mm thick wall, this bollard delivers exceptional strength and durability in industrial, commercial, and urban settings.

Featuring a 220mm x 220mm x 8mm thick base plate, this bollard provides a stable, heavy-duty surface-mounting solution that ensures secure installation onto concrete, asphalt, or other solid ground surfaces.

Features

- 120mm heavy-duty square profile.
- Reinforced surface mounting base.
- Full hot-dip galvanising (HDG) for superior corrosion protection.
- Highly durable for long-term security.
