

T-Top Bollard with Base 6kg

BTB758-6

Description

Enforcer T-Top Bollard With Base 6KG is a versatile bollard that fits various uses and industries. Perfect for councils, factories, construction companies, warehouses and loading zones to control vehicle and foot traffic flow.

Constructed from flexible PVC, the T-Top bollard can be used to control traffic flow and mark hazards like roadworks and construction areas. It can absorb light impacts without damaging vehicles, making it perfect for warning motorists around busy areas. The bright red colourway and reflective tape ensures visibility even in lowlight conditions. It can be used with barrier mesh and bunting flags for added safety.

Features

- Bright red with silver reflective tape for visibility.
- Can be used with barrier meshes and orange bunting flags.
- Compatible with T-top retractable belt barrier tops.
- Ideal for construction zones, road repairs, and work areas.
