

Reflective Traffic Cone 450mm

BTC760R

Description

Enforcer Reflective Traffic Cone 450mm is an effective tool for efficiently defining safe boundaries for pedestrians and vehicles. They can be used by businesses, councils, construction companies and others to restrict access around hazards and to raise awareness.

Constructed from flexible PVC, our traffic cones can be used to guide vehicle traffic without causing expensive damage if minor impacts occur. The PVC is UV stabilised and wont warp or crack in the outdoors. Their portable design means they can be deployed efficiently in emergencies to create safe pathways for motorists and pedestrians or to mark hazards like spills

Features

- Flexible and made of PVC.
- UV stabilized material.
- Durable black rubber base.
- Class 1 reflective sticker for great visibility.
