

Reflective Traffic Cone 700mm

BTC761R

Description

Enforcer Reflective Traffic Cone 700mm is a large traffic cone used to efficiently create safe boundaries for pedestrian and motorist safety. They can be used by shopping centres, businesses, and construction companies to control access and define safe pathways around hazards.

Constructed from flexible PVC, our traffic cones can be used to guide vehicle traffic without causing damage if minor accidents occur as they can absorb impacts. The PVC is UV stabilised and wont warp or crack making them suitable for outdoor use. Their portable design means they can be deployed efficiently in emergencies to create safe pathways or to mark hazards like spills

Features

- Flexible and made of PVC.
- UV stabilized material.
- Durable black rubber base.
- Class 1 reflective sticker for great visibility.
