

Traffic Cone 700mm

BTC761

Description

Enforcer Traffic Cone 700mm is an effective tool for efficiently defining safe boundaries for pedestrians and vehicles. They can be used by businesses, councils, and construction companies to restrict access around hazards and to raise awareness.

Constructed from flexible PVC, our traffic cones can be used to guide vehicle traffic without causing damage if minor impacts occur. The PVC is UV stabilised and wont warp or crack making them suitable for outdoor use. Their portable design means they can be deployed efficiently in emergencies to create safe pathways for motorists and pedestrians or to mark hazards like spills. The rubber base ensures the traffic cone sits securely on any surface and provides grip without needing to be permanently fixed.

Features

- Flexible and made of PVC.
- UV stabilized material.
- Durable black rubber base.

Specifications

SKU	BTC761
Length	350 mm
Width	350 mm
Height	700 mm
Weight	3.2 kg
Colour	Orange
Material	PVC
