

Crowd Control Barrier - Galvanized

CCB-G

Description

Enforcer Crowd Control Barrier can be used indoors and outdoors to guide and manage high foot traffic and crowds. Crowd control barriers are easy to install, can be interlocked to desired length, and are a simple and effective crowd control solution to improve safety on worksites, factories, sporting events and even concerts and festivals.

Manufactured from galvanised steel, our barriers perform in any weather condition and resist rust and corrosion. The durable footing ensures your barriers will remain stable and perform in heavily crowded conditions.

Features

- Made of Galvanised steel.
- Series of barrier can be used joined.
- Can be used indoors and outdoors.
