FULL DOME MIRROR - 600MM

- 360° fully reflective mirror allows for circular wide viewing
- Cost-effective means of monitoring
- Prevents the occurrence of crashes and collisions in two-way traffic zones
- Light and hassle-free installation

The Full Dome Mirror – 600mm is a 360° fully reflective mirror made of acrylic with a black rubber edging. Acrylic is a strong material that is not easily scratched and is shatter-free. The product is lightweight but durable and can be installed in a variety of places, indoor use only.

It provides the widest visibility of a specific indoor area. The full dome mirror allows every viewer to see oncoming traffic from several directions at the same time and prevents the risk of crashes and collisions.

They can be installed in child minding centres and in day care establishments to enhance security and monitoring of children's activities. They are best installed in corners and intersections of warehouses, loading bays, hotels, clinics, hospitals, retirement villages and public spaces.

Strong & Durable

Australian Standards Approved

Easy Installation
