HALF DOME MIRROR - 600MM

- 180° reflective mirror
- Made of durable, scratch-free acrylic
- Cost-effective means of monitoring
- Can be used in room corners and end of corridors
- Light and hassle-free installation

The Half Dome Mirror – 600 mm is a 180° fully reflective mirror made of acrylic with black rubber edging. Acrylic is a strong material that is not easily scratched and is shatter-free.

It offers the greatest visibility of a particular indoor space. The 180° coverage makes the mirror suitable for installation at the end of corridors and passageways or of indoor two-way traffic areas. Half dome mirrors can be positioned between a wall and a ceiling and are used to safeguard assets and businesses because of its huge, reflective surface, which deters theft.

They are best installed in corners and intersections of warehouses, loading bays, hotels, clinics, hospitals, retirement villages and public spaces.

Strong & Durable

Australian Standards Approved

Easy Installation
