

# Half Dome Mirror-600mm

## CM-HD-600

### Description

The Half Dome Mirror 600 mm is a 180° fully reflective mirror made of durable acrylic with black rubber edging. Known for its strength and scratch resistance, acrylic is an excellent choice for various construction tools and fixtures. This lightweight yet sturdy product can be installed in multiple locations.

Maximised Visibility for Hazardous Areas With its 180° coverage, this mirror is perfect for installation at the ends of corridors, passageways, and areas with indoor two-way traffic. The dome shape enhances visibility of oncoming traffic, particularly in blind corners, significantly reducing the risk of crashes and collisions.

### Features

- 180° reflective mirror.
- Made of durable,scratch-free acrylic.
- Cost-effective means of monitoring.
- Can be used in room corners and end of corridors.
