

# Docking Bumper - Black Rubber

## DBR-100150

### Description

Enforcer Docking Bumper Black Rubber is designed for loading zones and warehouses to mitigate the costly damage caused by impacts from reversing vehicles. A simple and effective solution that protects both vehicles and your loading bay infrastructure, our docking bumpers are perfect for loading bays, jetties and other facilities where impacts from reversing vehicles can occur.

Manufactured from high quality rubber, our docking bumpers are specially designed to absorb impacts from heavy moving vehicles, machinery and boats. The rubber bumpers can be used indoors and outdoors and are designed to perform in any Australian weather.

### Features

- Manufactured from high quality rubber.
- All models are pre-drilled, mounting holes for easy installation.
- Appropriate for outdoor and indoor protection.
