DOCKING BUMPER PAD - BLACK RUBBER

- Manufactured from high-strength rubber
- Protection against impacts and collision
- Can be used in indoor or outdoor
- Installation service available

The Docking Bumper Pad - Black Rubber is the ideal way to prevent harm to structures and cars while loading and unloading.

This bumper pad is made of high-strength rubber, is designed to endure the worst conditions, and may be used in loading bays and even jetties.

Measures 400mm by 200mm with a height of 100mm and weighs 12 kg, this offers exceptional protection against impacts and collisions, keeping your assets safe and secure whether you're working inside or outside.

Strong & Durable

Australian Standards Approved

Easy Installation
