

Docking Bumper Pad - Black Rubber

DBR-P450

Description

Enforcer Docking Bumper Pad Black Rubber is designed for loading zones and warehouses to mitigate the costly damage caused by impacts from reversing vehicles. A simple and effective solution that protects both vehicles and your loading bay infrastructure, our docking bumper pads are perfect for loading bays, jetties and other facilities where impacts from reversing vehicles can occur.

Manufactured from high quality rubber, our docking bumper pads are specially designed to absorb impacts from heavy moving vehicles, machinery and boats. The rubber pads can be used indoors and outdoors and are designed to perform in any Australian weather.

Features

- High-quality rubber construction for durable impact protection.
- Designed to absorb impacts from reversing vehicles, machinery, and boats.
- Suitable for indoor and outdoor loading environments.
- Mounting holes for straightforward installation.
- Ideal for loading bays, warehouses, jetties, and similar facilities.
