

Multi Message Sign Yellow Bi Pod Leg

EMMSG-YL

Description

The Enforcer Multi Message Sign Yellow Bi Pod Leg is designed to provide stable ground support for the Enforcer Multi Message Sign Frame used in road work and construction environments. Built for temporary traffic management applications, the leg securely supports the sign frame to ensure clear visibility of multiple safety messages. Its removable design allows for quick installation, easy transport, and compact storage, making it practical for crews working across construction sites, maintenance zones, and government or council projects.

Features

- Designed for Enforcer Multi Message Sign Frame.
- Powder coated safety yellow for high visibility.
- Provides stable ground support for temporary signage setups.
- Quick and simple installation on site.
