

Multi Message Sign Frame

EMMSG

Description

Designed for road work or construction environments where multiple messages need to be communicated, Enforcer Multi Message Sign Frame is an indispensable tool for managing pedestrian and vehicle traffic. For temporary use, it allows multiple signs to be installed on a single frame, making it suitable for various industries and settings like construction sites, government and council projects, and maintenance zones.

Features

- Allows multiple traffic and safety signs to be mounted on a single frame.
- Made from steel and finished in powder coated safety yellow.
- Designed for temporary roadwork and construction environments.
- Easy to transport, install, and reposition as required.
