

Enforcer Rail Self-Closing Gate Kit – 1120mm

ER-SCG-1120

Description

The Enforcer Rail Self-Closing Gate (1120 mm) is a heavy-duty access control component designed for modular handrail systems.

Made from hot-dipped galvanised steel, this gate withstands tough conditions in both indoor and outdoor settings. Its hoop-style frame includes a spring-loaded mechanism that ensures the gate closes automatically supporting safety, access control, and compliance in high-risk environments.

Features

- Manufactured from hot dipped galvanised steel for rust resistance and long service life.
- Spring-loaded self-closing mechanism for safe and reliable operation.
- Built to endure industrial use and repeated cycles.
- Protects vulnerable points from corrosion for added longevity.

Specifications

SKU	ER-SCG-1120
Diameter	48 mm
Hoop Length	1120 mm
Hoop Height	520 mm
Overall Height	700 mm
Weight	15 kg
Colour	Galvanised/Safety Yellow
Finish	Hot-dipped galvanised steel/ Powder Coated Safety Yellow
Warranty	12 months

Available Finish

Yellow

Galvanised
