

Enforcer Rail Self-Closing Gate Hoop – 820mm

ER-SCG

Description

The Enforcer Galvanised Self-Closing Gate Hoop (820mm) is a heavy-duty access control component designed for modular handrail systems. Made from hot-dip galvanised steel with painted ends for added protection, this gate withstands tough conditions in both indoor and outdoor settings.

Features

- Made from hot-dipped galvanised steel.
- Durable hoop-style frame for gate applications.
- Excellent rust resistance.
- Suitable for indoor and outdoor environments.
- Designed for modular handrail systems.
