Product Spec Sheet

Three Way Through

ER116

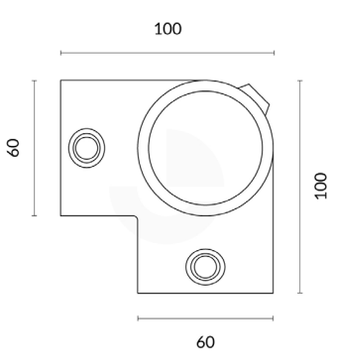

Description

The Enforcer Three Way Through is a heavy-duty rail fitting designed to create a secure three-way connection within modular Enforcer Rail systems. Its practical configuration allows multiple rail sections to intersect and connect, providing greater flexibility when designing customised handrails, safety barriers and protective rail structures. Built for demanding industrial and commercial environments, it helps create stable and professional modular rail configurations.

Features

- Heavy-duty construction for commercial and industrial environments.
- Three-way connection design for joining compatible rail sections.
- Secure through connection for stable rail configurations.
- Compatible with Enforcer Rail components and modular fittings.
- Modular design for flexible layouts and system expansion.

Specifications

SKU	ER116
Length	100 mm
Width	60 mm
Height	100 mm
Thickness	5 mm
Weight	0.71 kg
Material	Hot Dipped Galvanised Steel
Warranty	12 Months
