

Internal Expanding Joint (Set)

ER150

Description

The Internal Expanding Joint (Set) for Enforcer Rail is engineered to create strong, concealed inline connections between rail sections while maintaining a clean, uninterrupted appearance. Installed inside the rail, the expanding mechanism provides a secure mechanical connection without the need for external clamps or welding. Ideal for handrails, guardrails, and safety barrier systems, this fitting delivers outstanding strength, durability, and a professional finish for commercial and industrial applications.

Features

- Manufactured from heavy-duty steel for superior strength and durability.
- Internal expanding mechanism provides a secure concealed connection.
- Creates a clean, streamlined appearance without external fittings.
- Ideal for extending handrails, guardrails, and safety barrier systems.

Specifications

SKU	ER150
Width	40 mm
Height	70 mm
Thickness	5 mm
Weight	0.52 kg
Material	Hot Dipped Galvanised Steel
Warranty	12 Months
