Product Spec Sheet

Open Cross Over (Cradle Clamp)

ER201

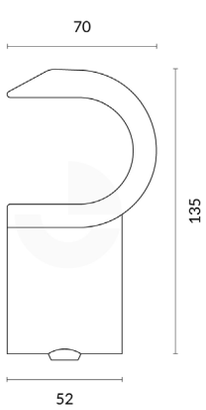

Description

The Open Cross Over (Cradle Clamp) for Enforcer Rail is a heavy-duty rail fitting designed to create secure cross connections within modular Enforcer Rail systems. Its open cradle-style configuration allows compatible rail sections to be positioned and secured efficiently, making it ideal for constructing customised handrails, safety barriers and protective rail structures. Designed for demanding commercial and industrial environments, it provides a practical and reliable solution for intersecting rail layouts.

Features

- Open cradle-style design allows rail sections to be positioned for efficient assembly.
- Creates secure cross connections between compatible Enforcer Rail sections.
- Heavy-duty construction designed for demanding industrial and commercial environments.
- Helps maintain the alignment, stability and structural integrity of the rail system.
- Suitable for intersecting handrails, safety barriers and protective rail structures.

Specifications

SKU	ER201
Length	70 mm
Width	52 mm
Height	135 mm
Thickness	5 mm
Weight	0.81 kg
Material	Hot Dipped Galvanised Steel
Warranty	12 Months
