

Long Hook Clamp

ER300

Description

The Long Hook Clamp for Enforcer Rail is designed to provide a strong and dependable connection between rail components, ensuring maximum stability in modular railing systems. Its extended hook design delivers enhanced clamping strength, making it ideal for safety barriers, pedestrian handrails, and industrial guardrail applications. Engineered for durability and easy installation, the Long Hook Clamp is suited to demanding commercial, industrial, and public environments where reliability is essential.

Features

- Manufactured from heavy-duty steel for superior strength and durability.
- Extended hook design provides a secure and stable clamping connection.
- Clamp-on installation eliminates the need for welding or complex fabrication.
- Delivers reliable support for safety barriers, guardrails, and handrail systems.

Specifications

SKU	ER300
Length	110 mm
Height	140 mm
Material	Hot Dipped Galvanised Steel
Warranty	12 Months
