

End Stanchion w/ Base Fixing Plate - 11-30deg - Gal/Yellow ERK-EP-G2

Description

Enforcer Rails End Stanchion (Fall) featuring a Straight Angle Base Fixing Plate 11-30deg offers reliability and strength suitable for diverse safety applications. Featuring an adjustable base fixing plate and coming preassembled, the stanchion has been designed for efficient DIY installation for unique layouts. Our galvanised steel stanchions are perfect in tough environments like construction sites and industrial facilities where worker safety is paramount. They can also be used to enhance the safety of roofs to prevent falls and maintenance platforms to ensure worker safety on the job.

Our stanchion is made from high-quality galvanised steel that ensures longevity in harsh environments like outdoor areas, construction sites and industrial facilities. It has been designed to withstand Australian weather conditions without compromising performance.
