

End Stanchion (Fall) w/ Straight Angle Base Fixing Plate 45deg fittings - Gal/Yellow

ERK-SM-EP-F4-G

Description

Enforcer Rails End Stanchion (Fall) with Straight Angle Base Fixing 45deg fittings is constructed from strong galvanised steel and comes preassembled and ready to support a variety of applications. Fast and simple installation ensure the end stanchion is perfect for businesses and DIY enthusiasts needing a secure fall prevention system that can be installed efficiently. The stanchion can perform in tough environments and setting and can be used in roof fall prevention to enhance workplace safety, industrial walkways and maintenance platforms as well as demanding construction sites to protect workers exposed to height-related hazards.

The high-quality galvanised steel construction ensures strength and performance in all weather conditions making our end stanchion a strong solution for your business or facility. It has been designed to withstand Australian weather without compromising quality over time, making it suited for indoor or outdoor use.
