

End Stanchion w/ Base Fixing Plate - Gal/Yellow

ERK-SM-EP-G

Description

Enforcer Rails Pedestrian Rail ensures safety by creating a secure barrier for pedestrian walkways. Crafted from reliable stainless steel, it has been designed for efficient installation. The components can be replaced easily unlike other barriers on the market. The end piece can be used in industrial or public spaces, indoors or outdoors, to finish handrails securely for pedestrian safety.

Our Pedestrian Rail is made from high-quality galvanised steel to ensure long-lasting performance in all weather conditions. It provides a secure end fencing solution to complete handrails.

Features

- Rails Pedestrian Rail ensures safety by creating a secure barrier for pedestrian walkways.
- Crafted from reliable stainless steel, it has been designed for efficient installation.
- The components can be replaced easily unlike other barriers on the market.
- The end piece can be used in industrial or public spaces, indoors or outdoors, to finish handrails securely for pedestrian safety.

Specifications

SKU	ERK-SM-EP
Diameter	48 mm
Length	1000 mm
Weight	4.8 kg
Material	Galvanised Steel
