

Through Stanchion w/ Base Fixing Plate - Galvanised/Yellow

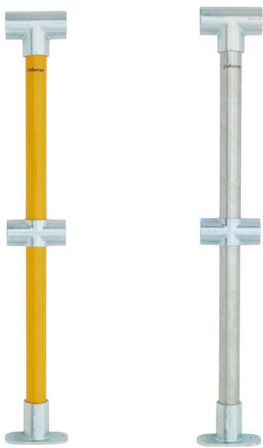

ERK-SM-TP

Description

Enforcer Rails Through Stanchion with Base Fixing Plate is a strong and reliable solution for creating safety barriers and handrail. Constructed from durable galvanised steel, it performs in all weather conditions and resists corrosion. It can be used to create stable connections between handrail sections for public spaces, industrial walkways and outdoor event safety barriers.

Features

- Preassembled design allows quick and efficient installation on-site.
- Durable hot-dip galvanised steel construction performs reliably indoors and outdoors.
- Versatile solution suitable for multiple safety applications in industrial and warehouse environments.

Specifications

SKU	ERK-SM-TP
