

Expandable Safety Barrier Steel - 3000mm Red/White With Wheels

ESB-3000-SW-R

Description

Enforcer Expandable Safety Barrier Steel 3000mm Red/White With Wheels can be used to create safe boundaries indoors and outdoors. It can manage foot traffic and guide crowds away from hazards. They are expandable to 3 metres and can even be interlocked to desired length. Being on lockable castor wheels, they can be installed and stored with ease. Perfect for worksites, warehouses and events.

Manufactured from steel with an awareness raising red and white finish, our barriers are designed to improve safety. The quality castor wheel footings are lockable, ensuring your barriers will remain stable when secured in place.

Features

- Manufactured from steel.
- Expandable up to 3 meters with lockable wheels.
