

Countersunk Concrete Screw Bolt (10mm x 100mm)

FX-CSUNK-10x100

Description

Countersunk Concrete Screw Bolt (10mm x 100mm) are high strength concrete and masonry anchors. It is both a universal and economical fixing that can be used for a range of construction works. These anchors do not expand and do not need plugs, making them perfect for use in masonry and concrete where cracking may be an issue. They include helical threads that allow the bolt to cut its own thread in concrete and masonry when tightened. Countersunk heads provide a visible fastening option with a lovely finish and permit flush installation with the fixture. It blends in smoothly with any substrates surface and is inconspicuous.

Heavy loads may be supported by the corrosion-resistant, durable and adaptable countersunk concrete screw blot which can be used both indoors and out in various Australian weather conditions. It is also removable and is suitable for projects that need temporary installations.

Features

- Screw blot which can be used both indoors and outdoors in various Australian weather conditions.
- It is also removable and is suitable for projects that need temporary installations.
- Screw bolt is very adaptable anchor as it can be set in a wide variety of foundation materials.
