

Sleeve Anchor Bolt Galvanised (12mm x 60mm)

FX-DB-HDG-12x60

Description

The Enforcer Sleeve Anchor Bolt Galvanised (12mm x 60mm) is one of the most widely used masonry and concrete fasteners available. They are a medium duty fastener that have the ability to fix medium to heavy loads. The four distinct components that make up the sleeve anchor are the breakup sleeve, a threaded stud bolt or body, a nut, and a washer. The sleeve anchor is featured with a hex nut head.

By expanding, the sleeve anchors embed themselves into masonry substrates like concrete, hollow or solid block, hollow or solid slabs, or other materials. They are used to anchor various types of construction fixtures like steel or timber

Features

- Suitable for medium to heavy-duty anchoring applications.
- Expands inside the substrate for strong, vibration-resistant hold.
- Hex nut head for easy tightening with standard tools.
- Corrosion-resistant finish for extended durability in various environments.
- Ideal for fixing bollards, steel structures, timber, and other fixtures.

Specifications

SKU	FX-DB-HDG-12x60
Dimension	12mm x 60mm
Colour	Galvanised
Material	Galvanised Steel
