

Height Clearance Bar 2 Metres Long

HB-2

Description

Enforcer’s Height Clearance Bar 2 Metres Long has been expertly manufactured from Purlin steel, finished in a safety yellow powder coating. It effectively communicates the height restriction to oncoming motorists entering a height restricted area. Perfect for carparks, garages, warehouses, drive throughs and all indoor and outdoor projects where there is a risk of damage to vehicles and property caused by oversized vehicles entering restricted height zones.

Features

- Made of Purlin steel for lightweight.
- Parallel flange channel single sided.
- Highly reflective red/white panels on both ends.
- Customised size to suit project needs.
- Customised safety message wordings as needed.
