

Height Clearance Bar – Hanger

HB-HANGER

Description

Enforcer Height Clearance Bar - Hanger is a robust wall-mounted solution designed for securely supporting height clearance bar, in commercial, industrial, and parking environments. Engineered with hot dipped galvanised steel construction and finished with black powder coating, it delivers excellent strength, corrosion resistance, and long-term durability. The adjustable hanging bar design allows for precise positioning, making it ideal for applications where reliability and clean installation are essential.

Features

- Heavy-duty wall mount base plate.
- Adjustable hanging bar for flexible positioning.
- Hot dipped galvanised steel with black powder-coated finish for superior corrosion protection.
- Suitable for indoor and outdoor installations.
