

Plastic Fence Portable Barrier - 1000mm Orange

PFB-1000-O

Description

Enforcers Plastic Fence Portable Barrier - 1000mm Orange is a robust and versatile barrier constructed from high-density polyethylene. The portable barrier can be used to restrict access and form a safe perimeter around equipment or hazards. Multiple units can be linked to form barriers suited to your project needs and it can be used in car parks, hospitals, schools and sports and recreation centres.

Suitable for creating barriers indoors and outdoors, our plastic fence is exceptionally durable despite being lightweight in design. The strategic footing also offers wind resistance. It ensures workplace and public safety by allowing you to create temporary fences, barricades and enclosures.

Features

- Made of hard-wearing, high-density polyethylene (HDPE).
- Easy to assemble and disassemble.
- Can be used indoors and outdoors.
