

Kerb Ramp Rubber Black - 110mm High

RKB-500

Description

Ensure safety by using Enforcer Kerb Ramp Rubber Black 500mm to create smooth access anytime there are changes in surface levels, such as steps and roadside kerbs. Kerb ramps provide a safe incline for pedestrians, wheelchairs, vehicles, trolleys, bicycles, lawn equipment and other machinery to drive over. The compact design means this kerb ramp can be quickly grabbed from the back of a van and placed in a kerb for fast and efficient access, perfect for delivery workers or movers.

Constructed from heavy duty recycled rubber and featuring an anti-slip design so ensure the ramp stays in place, the kerb ramp can be used outdoors in any weather as a permanent or temporary feature.

Features

- Manufactured from heavy-duty solid rubber.
- Can be used for a temporary or permanent solution.
- Withstands from heavy cars, trucks, and forklifts.
- Can be used individually or join together to form a longer ramp.
- Perfect size to carry by one person.
