

Speed Hump Cable Protector 3 Channel

SH-CP3C

Description

Enforcer Speed Hump Cable Protector Three Channel is an innovative cable protection tool made from new and recycled rubber. It works by organising and safely storing cables in three channels, allowing pedestrians and vehicles to pass over the cables without risk of trips and accidents.

Constructed to be durable enough for use indoors and outdoors, these cable protectors can be lined up to suit your required length. They safely store your cables and wiring, reducing the risk of trips and accidents from vehicles and pedestrians crossing over cables. The safety yellow colour also helps to increase safety by drawing attention to the speed hump.

Features

- Manufactured from new and recycled rubber.
- Designed to be strong and durable with low noises.
- Great for indoor or outdoor use.
- Easy placement and removable of cables/hose lines.
