

Enforcer Heavy Duty Poly Speed Hump

SH-Poly

Description

Enforcer Heavy Duty Poly Speed Hump is made from ultra tough linear low-density polyethylene to withstand constant heavy traffic. It is perfect for use around schools, hospitals, busy car parks and other areas close to pedestrian foot traffic. It is designed for indoor and outdoor use and wont warp, crack or fade in the sun or harsh weather. The patterned surface increases grip and traction for vehicles and pedestrians to pass over safely. This speed hump also features a cable channel to organise and store cables over roads without creating hazards.

Features

- Manufactured from ultra-tough Linear Low-Density Polyethylene (LLDPE).
- Patterned surface increases grip and traction.
- Light weight and easy to install.
- Designed for outdoor and indoor heavy traffic.
- Features built in cable channel.
