

Heavy Duty Rubber Speed Hump

SH-Rubber-N

Description

Enforcer Heavy Duty Rubber Speed Hump is a reliable solution for traffic control, ideal for use in locations like schools, hospitals, retirement villages, and car parks to reduce vehicle speeds and enhance safety for pedestrians. Made from 100% recycled rubber, this speed hump is designed to be resilient, offering superior durability without cracking or shrinking, even under continuous traffic and is suitable for installation on both concrete and asphalt surfaces.

Features

- Manufactured from 100% recycled rubber.
- Designed to be strong and durable with low noises.
- Built In presmatic reflectors for enhanced night visibility.
- Light weight and easy to install.
