

Trench Cover - 1200 x 800mm

TC-120X80

Description

For use on construction sites, utility maintenance and infrastructure projects, Enforcer Trench Cover 1200 x 800mm is a strong and effective way to bridge trenches for safe passage.

The yellow design raises awareness of the hazard while the steel backing ensures the trench cover is strong and durable for heavy traffic and harsh environments. It ensures pedestrians and workers can pass over trenches safely. The patterned surface design increases grip and traction, reducing the risk of slips and accidents. Our trench cover is also designed with bottom grip, ensuring your trench cover stays in place securely while in use.

Features

- High visible Yellow.
- Anti-slip pattern on top for safety.
- Steel strip backing to bear loads.
- Can be used indoors and outdoors.
