

Traffic Cone Reflective 900mm

TCR900

Description

The Enforcer Reflective Traffic Cone (900mm) is designed for superior visibility and effective hazard identification, essential for managing pedestrian and vehicle safety in low-light and high-risk environments. Made from durable, impact-resistant PVC, this reflective cone offers reliable performance and exceptional resilience even in challenging Australian weather conditions. Featuring bright orange colouring with highly reflective tape, it ensures maximum visibility day and night, clearly marking hazards and enhancing workplace and public safety. Its robust, weighted base provides stability, reducing movement under windy or busy conditions, making it ideal for roadworks, construction sites, car parks, events, and emergency response areas.

Features

- High visible bright orange colour.
- Features bright reflective bands to ensure maximum visibility, enhancing safety in low-light conditions.
- Manufactured from tough, weather-resistant PVC.
- Stable, Weighted Base.
- Portable & Easy to Handle.
