Product Spec Sheet

Enforcer Tactile Indicator Single Stud - Black Stainless Steel 316
TI-BSS

Description

This premium-grade tactile indicator combines sleek design with high durability. Featuring a deep matte-black PVD-coated finish over marine-grade 316 stainless steel, it delivers outstanding wear and corrosion resistance, even in harsh coastal or high-traffic environments. Designed with raised concentric rings for tactile grip and hollow-back construction for concealed fixing, it provides long-lasting performance and aesthetic harmony in modern architectural settings.

Features

- Matte black PVD finish for a sleek, modern look.
- Highly durable—resists scratching, chipping, and UV fading
- Raised concentric rings for AS 1428.4.1 tactile compliance.
- Hollow-back design allows concealed fixing and reduces weight.
- 316 stainless steel core for corrosion resistance in harsh environments.
