

Tactile Indicator Single Stud - Brass

TI-GSS

Description

Enforcer’s Tactile Indicator Single Stud Brass improves safety for pedestrians using walkways, especially those with visual impairments. Tactile indicators provide additional traction to prevent slips and falls. Our tactile indicators can be installed in groups and can be used indoors and outdoors in shopping centres, public spaces, schools and hospitals.

Features

- Warm gold finish with natural metallic sheen.
- Brushed concentric rings for compliant tactile feedback.
- Solid H59 brass body ensures strength and stability
- Hollow-back reduces weight and hides adhesive or anchor.
- Resists corrosion in indoor and sheltered outdoor areas.
- Suitable for high-end, heritage, or contrast wayfinding projects.
