TACTILE INDICATORS - PEEL & STICK HAZARD 300MM X 300MM

- Manufactured from UV polymer
- Australian Standards AS1428.1-2009 Compliance
- Only requires 30% luminance contrast
- Fast installation. Zero downtime, install and walk on immediately

Enforcer Tactile Indicators are available in an easy-to-use 300mm x 300mm size and require no additional tools or equipment to install. Their peel-and-stick construction makes installation simple and fast. Simply peel off the backing and stick the material to any surface that is smooth, dry, and clean.

These tactile indicators are composed of a high-quality, slip-resistant material that is designed to withstand inclement weather and foot activity, ensuring they maintain their non-slip quality and durability over time. The elevated hazard component offer a distinct and simple marker to indicate a hazard, obstacle or a public service point in open spaces. These indicators can be used in a variety of public settings, including offices, retail malls, hospitals, schools and train stations, as well as in private settings.
