

Tactile Indicator Single Stud -Stainless Steel With Black Carb Insert - Peel & Stick

TI-SS-BC-PS

Description

Enforcer Tactile Indicator Single Stud in Stainless Steel with Black Carb Insert Peel and Stick can be used to create safe boundaries and guide foot traffic around trip and fall hazards in areas like train station platforms, loading docks, wharfs and carparks. The studs can be used to guide visually impaired people safely around hazardous areas by indicating a boundary has been reached. The black carb inserts provide extra grip and reduce the risk of trips and slips in all weather conditions. They are durable enough for outside use.

Features

- Made from stainless steel.
- Black carborundum insert top provides excellent grip.
- Slip resistant design with R12 slip rating.
- Quick and simple installation using peel-and-stick backing.
