

Tactile Indicator 316 Stainless Steel PVD Black 300x600

TI-SSP-B-30X60

Description

Enforcer 316 Stainless Steel PVD Black Tactile Indicator 300 × 600 mm is designed to provide high-performance pedestrian safety and accessibility compliance in high-traffic environments.

Engineered to meet the demands of commercial, industrial and public sites, this tactile ground surface indicator ensures hazard awareness, way-finding and guidance for visually-impaired users while offering a premium finish that complements modern construction. Ideal for interior and exterior applications, it's specified where durability, aesthetics and compliance matter.

Features

- Marine-grade 316 stainless steel for superior corrosion resistance.
- Black PVD finish with scratch-resistant durability.
- Slip-resistant surface for improved pedestrian safety.
- Suitable for indoor and outdoor applications
