

Stainless Steel 316 With Black Carborundum Infill 300x300

TI-SSP-BC-30x30

Description

Enforcers Stainless Steel 316 with Black Carborundum Infill 300x300 provides superior slip protection where individual studs are insufficient. The stainless-steel construction with black infill also offers a sleek and professional appearance making it suitable for a wide range of applications like shopping centres, offices and facilities.

Each 300x300mm stainless-steel plate comes with 36 fully welded tactile indicators that are secured through the plate, meaning they will never be removed or accidentally kicked off. The tactile indicator provides excellent anti slip protection and is compliant with Australian Standards AS/NZS 1428.4:2009. The stainless steel also resists weathering and corrosion making it suitable for both indoor and outdoor use in challenging weather.

Features

- Compliance to AS1428.1-2009.
- P5 Slip Resistance Rating.
- Stainless Steel 316 construction.
- Lightweight pre-moulded construction and beveled edges.
