

Stainless Steel 316 Tactile Plate With Black Carborundum Infill 300x600

TI-SSP-BC-30x60

Description

Enforcer Stainless Steel 316 Tactile Plate with Black Carborundum Infill 300mm x 600mm is a highly durable, high grip safety solution for walkways. Simple and effective, it requires only a drill and screws to install. The polished stainless-steel finish makes this tactile indicator suitable for retail areas, offices and other sites where a refined look and feel is required. It is also suitable for outdoor areas.

Constructed from one single stainless-steel plate with welded tactiles, this tactile indicator is durable and high quality. The slip resistant design makes this perfect for indoor and outdoor use for high traffic areas. It is also especially useful for creating a clear and identifiable path for people with vision impairments to confidently navigate pedestrian ways.

Features

- Compliance to AS1428.1-2009.
- P5 Slip Resistance Rating.
- Stainless Steel 316 construction.
- Lightweight pre-moulded construction and beveled edges.
